

Process Optimization for Operations

Question:

How can we reduce manual effort in the client onboarding process?

Category: business-analysis

Difficulty: Intermediate

Tags: Operations, Process Improvement, Automation, Efficiency

Framework / Approach:

1. Process Mapping
2. Gap Analysis
3. Automation Strategy
4. Stakeholder Alignment

Snapshot / Solution:

Mapped the current as-is process for client onboarding, identifying 5 major bottlenecks causing a 14-day delay. Proposed a to-be process incorporating automated document verification and a self-serve portal. Reduced onboarding time by 40% and improved client satisfaction scores.
