

Instagram Daily Active Users in India

How many people in India use Instagram daily?

Step 1: Population Funnel

Layer	Logic	Number
India Population	Known	~1.45B
Internet Users	~55% penetration	
Smartphone Users	~85% of internet users	~800M
Social Media Users	~75% of smartphone users	~680M
Instagram Accessible Users	Skews urban, 18-35 (~50% of SM)	~510M
		~255M

Step 2: DAU/MAU Ratio

Instagram globally runs ~60–65% DAU/MAU. India is a high-engagement, mobile-first market — people doom-scroll Reels hard. So I'll use 65%.

Instagram India MAU "H ~230–250M (reasonable estimate for a market this size)

DAU = 250M × 65% "H 160M

Step 3: Sanity Checks

- WhatsApp India DAU ~500M !' Instagram at ~30% of that makes sense (more niche, skews younger/urban)
- YouTube India DAU ~250M !' Instagram slightly below, reasonable since YouTube is more mass-market
- Meta has disclosed India as their #1 or #2 market by users globally — 160M DAU tracks

Final Answer

~150–160 Million Daily Active Users
