

Daily Swiggy/Zomato Orders in India

Estimate the daily number of Swiggy or Zomato orders in India.

Step 1: Addressable User Funnel

Layer	Logic	Number
India Population	Known	~1.45B
Urban Population	~35% live in cities	~500M
Smartphone + Internet (Urban)	~80% of urban	~400M
Food Delivery App Installed	~40% of those	~160M
Monthly Active Orderers	~50% actually order	~80M

Step 2: Order Frequency Segmentation

Segment	% of MAU / Users	Orders/Mo	Total/Mo
Power Users (bachelors, urban pros)	15% 12M	12	144M
Regular Users (2–3x/week)	25% 20M	10	200M
Occasional Users (weekends)	60% 48M	3	144M

Total Monthly Orders "H ~488M | Daily Orders = $488M \div 30$ "H ~16M/day

Step 3: Adjust for Quick Commerce Food Players

My funnel above only captures Swiggy/Zomato-type behaviour — planned meal ordering. It misses impulse 10-min orders which have a different user psychology and incrementally add to the market.

Zepto Café + Bistro + Swish = ~4–5M/day incremental

Adjusted Total Market: ~20–22M orders/day

Step 4: Market Share Split

Player	Market Share	Orders	Daily
Zomato	~38%		~8–9M
Swiggy	~30%		~6–7M
Zepto Café	~10%		~2M
Bistro (Zomato)	~7%		~1.5M
Swish	~5%	~1M	
Others	~10%	~2M	

Final Answer

Total market: ~20–22M orders/day

Zomato: ~8–9M | Swiggy: ~6–7M | Quick commerce food: ~4–5M | Rest: ~2M
