

WhatsApp Messages Per Day in India

Question:

How many WhatsApp messages are sent per day in India?

Category: guesstimate

Difficulty: Intermediate

Tags: Tech, Social Media, India, DAU, Market Sizing

Framework / Approach:

1. User Segmentation
2. Behavioural Rate
3. Top-down Sanity Check

Snapshot / Solution:

India has 500M WhatsApp users. At 70% daily activity that is 350M DAU. Each user sends around 30 messages per day across personal chats, groups, and business. That gives $350M \times 30 = 10.5B$ messages. Meta reports roughly 100B globally; India at 15 to 20% of that is 15 to 20B. Directionally consistent.
