

Zomato Orders on IPL Final Night

Question:

Estimate the number of Zomato orders on the night of the IPL Final in India.

Category: guesstimate

Difficulty: Advanced

Tags: Food Delivery, India, Event-based, Consumer, Revenue

Framework / Approach:

1. Event Uplift Modelling
2. Group Behaviour
3. Baseline Plus Multiplier

Snapshot / Solution:

Normal peak night sees about 2M orders. IPL Final draws 400M viewers. 50M watch in groups, creating 25M viewing sessions. If 20% of those order food that is 5M ordering groups, producing roughly 6M orders at 1.2 orders each. A 3x uplift over the baseline of 2M puts the range at 5 to 7M. Plausible.
