

Online EdTech Market Size in India 2025

Question:

What is the total addressable market for online EdTech in India?

Category: guesstimate

Difficulty: Intermediate

Tags: EdTech, TAM, India, Market Sizing, B2C

Framework / Approach:

1. TAM/SAM/SOM
2. Demographic Segmentation
3. Willingness to Pay

Snapshot / Solution:

India has 1.4B people. Students in K-12 and higher education total around 350M. Of these, 40% are online-ready (smartphone plus internet access), so 140M. Willingness to pay sits at roughly 15%, giving 21M paying users. At an average spend of Rs 6,000 per year, TAM equals Rs 12,600 Cr or around \$1.5B. NASSCOM projects \$4B by 2025 including professional upskilling. Aligns well.
