

Rule Engine for Custom QA Flows

Question:

How do you let non-technical customers build complex automation rules without code?

Category: product-design

Difficulty: Advanced

Tags: No-Code, Automation, Enterprise UX, B2B SaaS, Onboarding

Framework / Approach:

1. User Interviews
2. Low-fi Prototyping
3. Mental Model Mapping
4. Usability Testing

Snapshot / Solution:

Interviewed 8 QA managers to map mental models around rule logic. Designed a drag-and-drop condition builder with AND/OR nesting, live preview, and template library. Shipped in 6 weeks.
