

Expense Feed Automation in Fintech

Question:

Design the UX for syncing bank transactions automatically into an accounting tool.

Category: product-design

Difficulty: Intermediate

Tags: Fintech, API Integration, Automation, User Flows, Accounting

Framework / Approach:

1. Competitive Analysis
2. User Flows
3. Error State Design
4. API Integration UX

Snapshot / Solution:

Audited 3 competitor integrations. Designed a 2-click connection flow with real-time sync status, conflict resolution UI, and rollback support. Reduced manual data entry by 40%.
