

DAU Dropped 23% in Q3

Question:

Our daily active users dropped 23% week-over-week after an OS update. Why?

Category: root-cause-analysis

Difficulty: Intermediate

Tags: Retention, Android, Notifications, 5-Whys, Cohort Analysis

Framework / Approach:

1. 5-Whys
2. Cohort Segmentation
3. Log Analysis
4. OS-level Debugging

Snapshot / Solution:

Segmented users by OS version. Android 13 users showed 0 retention at day 4. Drilled into push notification delivery logs and found the permission prompt was silently suppressed post-update due to a broken notification-channel registration.
