

3x Spike in Support Tickets Post Launch

Question:

Support volume tripled within 48 hours of a major feature release. What broke?

Category: root-cause-analysis

Difficulty: Advanced

Tags: Support, API, Fishbone, MECE, Launch

Framework / Approach:

1. Fishbone Diagram
2. MECE
3. Ticket Taxonomy
4. API Audit

Snapshot / Solution:

Fishbone analysis flagged API, UI, and docs as branches. MECE breakdown of ticket themes showed 68% were about data not syncing. Traced to an undocumented breaking change in a third-party API endpoint hitting mid-market accounts only.
